Mobile App and Software Developer with 3+ years of experience in designing and developing scalable, cross-platform applications for Android and iOS. Proficient in **Flutter**, **Dart**, and **Jetpack Compose**, with strong expertise in **state management** (BLoC, Provider, Riverpod) and **RESTful API** integration. Skilled in **Agile development**, **Git-based version control**, **AWS bucket s3**, **Retrofit, Type-safe Navigation, Okhttps** and UI/UX collaboration using **Figma** and **Adobe XD**, **Supabase Auth/PostgresSQL**.

SKILLS

- ❖ **Languages:** Dart, Jetpack Compose, Java.
- ❖ **Databases:** MongoDB, Firebase Cloud Storage, Supabase, Hive, SQLLite, AWS bucket s3.
- ❖ **Frameworks/Arch:** Flutter, Bloc, Getx, Riverpod, Provider, MVVM,FVM.
- ❖ **Tools:** VS Code, Canva, Figma, Adobe XD, Github, Gitlab, Android Studio, Postman, CI/CD, AWS bucket s3, Okhttp, Retrofit, Type-safe Navigation, Coil.
- ❖ **OS:** Windows, MacOS.
- ❖ **Mobile Deployment:** Play Store, App Store (iOS Deployment).

EXPERIENCE

TechSaga Corporation, Noida — *Flutter Dev*

Dec 2023 - Sep 2024

• Developed and maintained scalable Flutter applications, ensuring smooth performance across Android and iOS. • Collaborated in an Agile team environment with daily stand-ups and sprint reviews. • Integrated RESTful APIs, Firebase, and third-party SDKs (Razorpay, Agora, Chatify). • Improved app performance by optimizing UI rendering and reducing widget rebuilds. • Published and maintained production-ready apps on Google Play Store and Apple App Store. • Led testing, debugging, and version control using GitHub and CI/CD pipelines.

Inductus Limited, Noida — *Flutter Dev*

May 2023 - Dec 2023

• Contributed to multiple client projects using BLoC and Provider architecture for state management. • Designed and implemented responsive, pixel-perfect UI using Figma mockups. • Integrated Firebase Cloud Messaging(FCM) for push notifications and improved real-time communication. • Participated in Agile ceremonies including sprint planning, retrospectives, and task estimation.

Pearl Organisation, Dehradun — *Flutter Tech Executive*

April 2022 - May 2023

EDUCATION

D.A.V P.G College (SDSUU), Dehradun — *MSc IT/CS*

Aug 2024 - July 2026

D.A.V P.G College (HNBGU), Dehradun — *BSc IT/CS*

Aug 2018 - July 2021

NIOS, Dehradun — Senior Secondary *12th*

2017 - 2018

AWARDS

Employe of the month:

Make it to deliver the project before the deadline.

LANGUAGES

Hindi And English.

Jyotish Rashaya — *Astrologer App*

This application has 10k+ active users.
Developed an astrology consultation platform with chat (Chatify SDK) and voice calls (Agora SDK).
Implemented Firebase notifications and state management with Provider.
Razorpay payment integration for buying products from applications.

Online Canteen/Delivery Boy — *Food/Grocery Delivery App*

From managing the 10k+ active users.
We built an app for a local(Noida Based) food delivery service limited to a 10 km radius, which is handled by the backend team. Integrating map to send the current location users, Razorpay payment integration. To handle states I used provider management.

The Installer — *Agents Works***(Android)/(iOS)**

Developed a Flutter-based mobile application with a Laravel backend, supporting two primary user roles: **Dealers** and **Installers**. Dealers can hire installers to carry out customer projects, while installers manage their assigned tasks through the app, including marking site visits, starting work, completing jobs, and uploading images as proof of completion. All task progress is tracked in real-time and displayed in the installer's work history section. The app also features **WhatsApp integration from backend** and **Firebase Cloud Messaging (FCM)** to ensure instant task alerts and notifications for seamless communication and **AWS bucket s3** for image store.

Think IAS — Online *Course(LMS)*

Created an online learning platform with free and paid study materials.
Integrated REST API, video player, and payment functionalities. For handling the management I used a provider.

iJobhunt — Job Finder

iJobhunt is an application for posting and searching for jobs where users may interact directly with employers by just adding their basic details and resume in one click. REST API, and razor-pay payment functionalities for premium subscription, integration fcm for job notification and add google location search. For handling the states I used a provider.

Purvanchal Stores — Online Store

Create an online store for ordering items related to kisan(farmers) and styling clothes. This app is fully built on **Jetpack Compose** and for DB we use firebase.
