## TECHNICAL SKILLS

---

**Language:** Jetpack Compose, Flutter(Dart), Java, React(NextJs), Node, Typescript, Tailwind CSS.

**Database:** MongoDB, Firebase Cloud Storage, Supabase, Hive, SQLite, AWS bucket s3, Room DB, PostgreSQL.

**Tools:** VS Code, Canva, Figma, Adobe XD, Github, Gitlab, Android Studio, Postman, CI/CD, Okhttp, Retrofit, Type-safe Navigation, Coil.

**Frameworks/Arch:** Flutter, Bloc, Provider, Riverpod, MVVM, Compose, Springboot .

## EXPERIENCE

---

### [Software Developer - TechSaga Corporations, Noida](#)

Dec 2023 - Sep 2024

- Developed Jyotish Rahsyas Apps ([Astrologer](#) and [Customer](#))(10K+ downloads) on flutter with features like **WebSocket-based** real-time chat, Agora audio call, and live streaming with interactive video connections.
- Developed **multi-role E-Commerce App** ([Online Canteen](#) and [Delivery Boy](#)) (10K+ downloads) on flutter for courier, grocery & food delivery, handling frequent real-world order traffic.

### [Inductus Limited- Flutter Developer \(Noida\)](#)

July 2023 - Dec 2023

- Built ([Installer App](#)) using **Flutter, Firebase, Getx and Location Api with MVVM**.
- Handle **AWS S3 bucket** for storing resources.
- Fix **Agent location tracking** bugs manage old sdk versions using **fvm**.
- Delivered **within a month**.

### [Pearl Organisation - Android/Flutter\(Technical Executive\), Dehradun](#)

Aug 2022 - April 2023

- Developed a Kotlin(**Jetpack Compose**) app ([iJobhunt app](#)) for Germany based clients, in **6- weeks**.
- Managing flutter applications ([Think IAS-LMS](#) and [Hookup- Dating App](#)).

## PROJECTS

---

### [Hindi Bible](#) | Jetpack Compose, Firebase, Retrofit, Type-safe.

- Designed end-to-end on Jetpack Compose(**Material3**).
- Implemented **type-safe navigation, retrofit, FirebaseDB** and **firebase crashlytics**.
- Integrate **github action CI/CD automate build, test, and deployment pipeline**.

### [Purvanchal Store](#) | Jetpack Compose, Firebase, Retrofit, Coil, Type-safe

- Created a fully on **Jetpack Compose** integrating **Firebase Realtime DB** and **Firebase Analytics Dashboards**.
- Use **Cloudinary** for storing resources like (Image&Video).

### [FlexWorld](#) | NextJs, Typescript, Tailwind

- Created a production ready Movie app fully on **NextJs with Tailwind CSS** to design the full website.
- Use **TMDB** api for showing movie data and their details.
- For deployment I use **Vercel**.

### [Task Tracker](#) | Springboot, Maven, Java

- Built RESTful backend using Spring Boot following **Controller–Service–Repository architecture**.
- Implemented **DTO + Mapper pattern** for clean API design.
- Used **Spring Data JPA with Hibernate ORM** for database interaction.
- Configured **PostgreSQL database** inside **Docker container** for consistent development environment.
- Implemented **entity relationships** using JPA annotations (**@OneToMany**, **@ManyToOne**).
- Designed scalable APIs with **UUID identifiers and proper HTTP methods**.
- Tested endpoints using **Postman**.

### [Auth Web App](#) | Springboot, Maven, Java

- Built RESTful backend **auth web app** using Spring Boot following **Role based api Controller–Service–Repository architecture**.

- Used **Spring Data JPA with Hibernate ORM** for database interaction.
- Jwt token implementation and access token implementation.
- Social media login google and github.
- Configured **PostgreSQL database** inside **Docker container** for consistent development environment.
- Implemented **entity relationships** using JPA annotations (**@OneToMany**, **@ManyToOne**).

## CERTIFICATIONS

---

- [Git And Github](#) - Github
- [Flutter Development](#) - Bootcamp
- [Android App Development](#) - MobDevOps + Android
- [React\(NextJs\)](#) - Bootcamp
- [Springboot\(Java\)](#) - Bootcamp for Beginners

## ACHIEVEMENTS

---

- [Employee of The Month](#) - Pearl organization

## EDUCATION
